PROJECTS AND EXPERIENCE

Complete application of food recipes with
database, server and frontend

HENRY project

I developed a web application that takes the
data from the spoonacular API and displays
it together with what can be created within
the page and saved in my database.

Github: <https://github.com/kano96/foodapp>

Freelance Projects

Various projects on Frontend, using the
aforementioned stack. Both the code and the
details of each of these can be found in my
web portfolio at the following link:
